Bigger. Better. Stronger.**

About the DSSC Toolbox

DSSC Toolbox v3

The curated catalogue of data space solutions. Business and technical tools

Aligned with the DSSC Blueprint. Verified with self-assessments

The go-to reference for data space participants, authorities, and operators

A living, crowdsourced catalogue with real implementation insights. Submit today!

What is new?

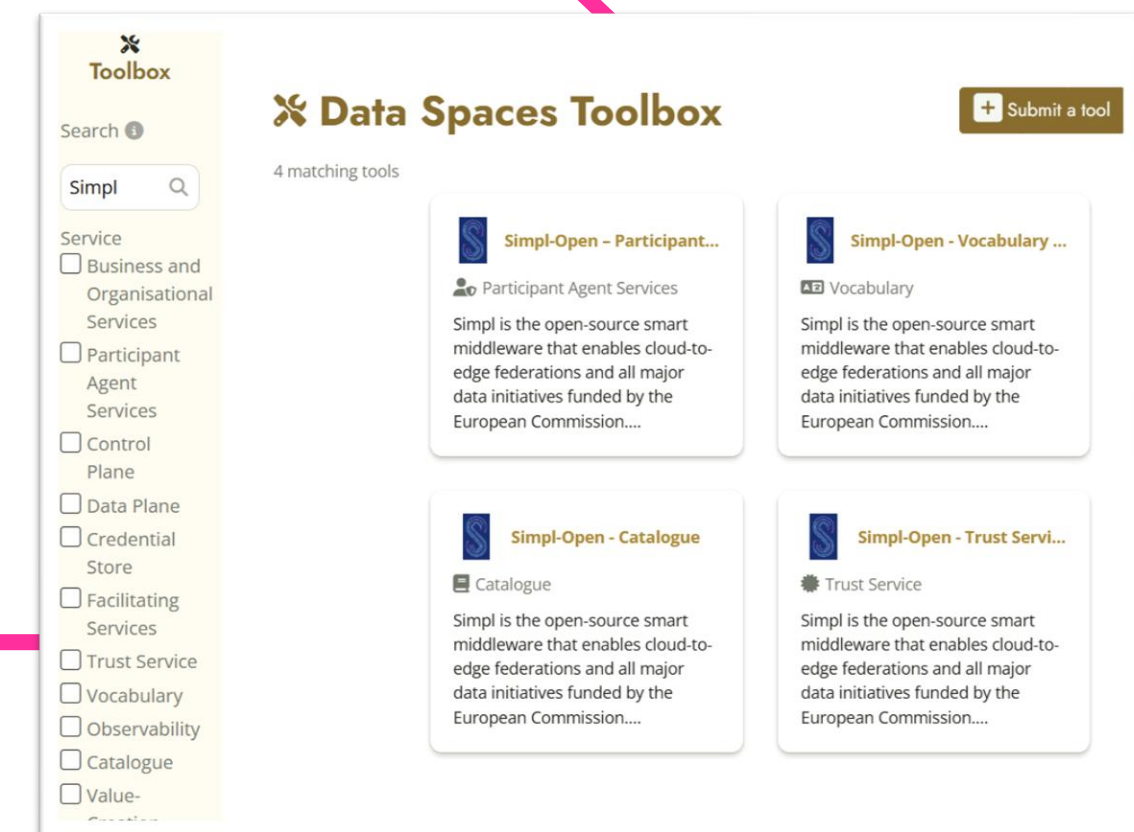

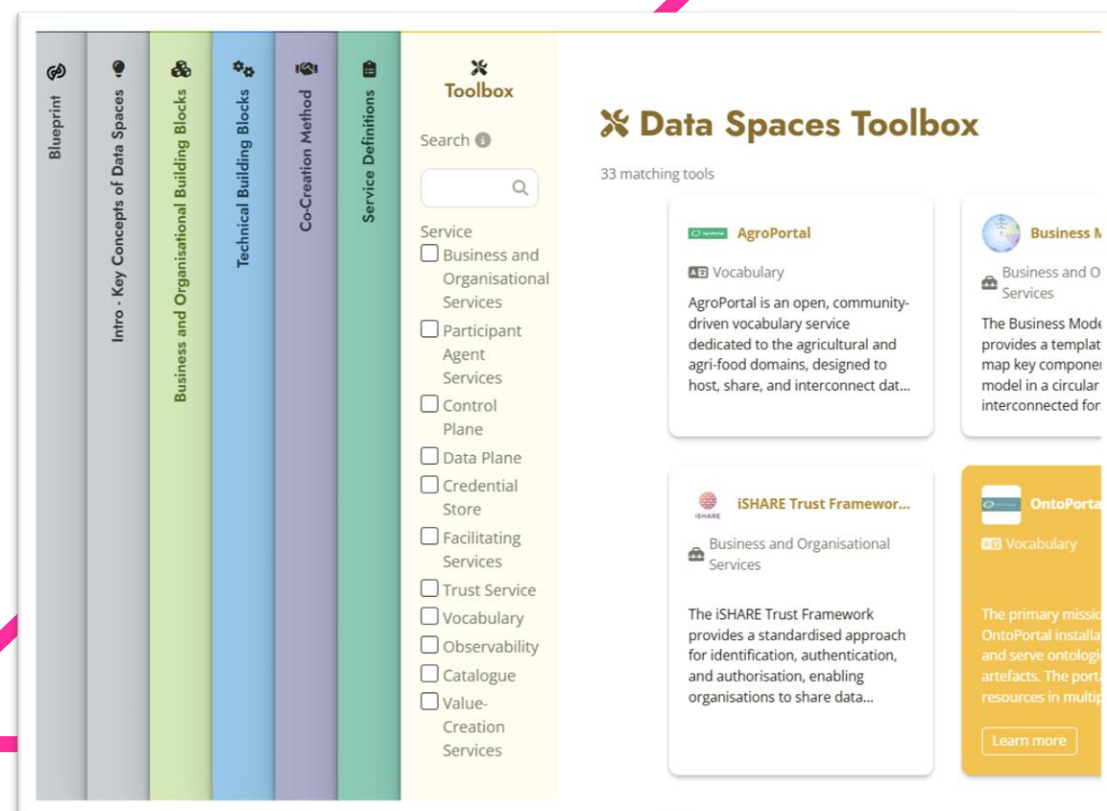

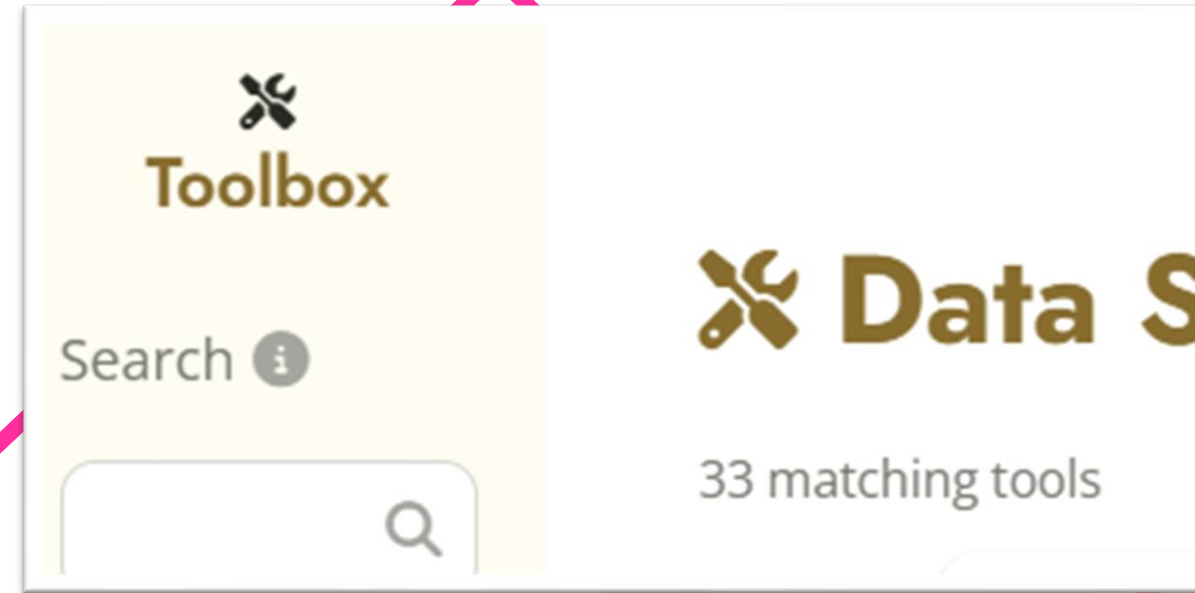

DSSC Toolbox v3

Many new tools, covering
all services definitions

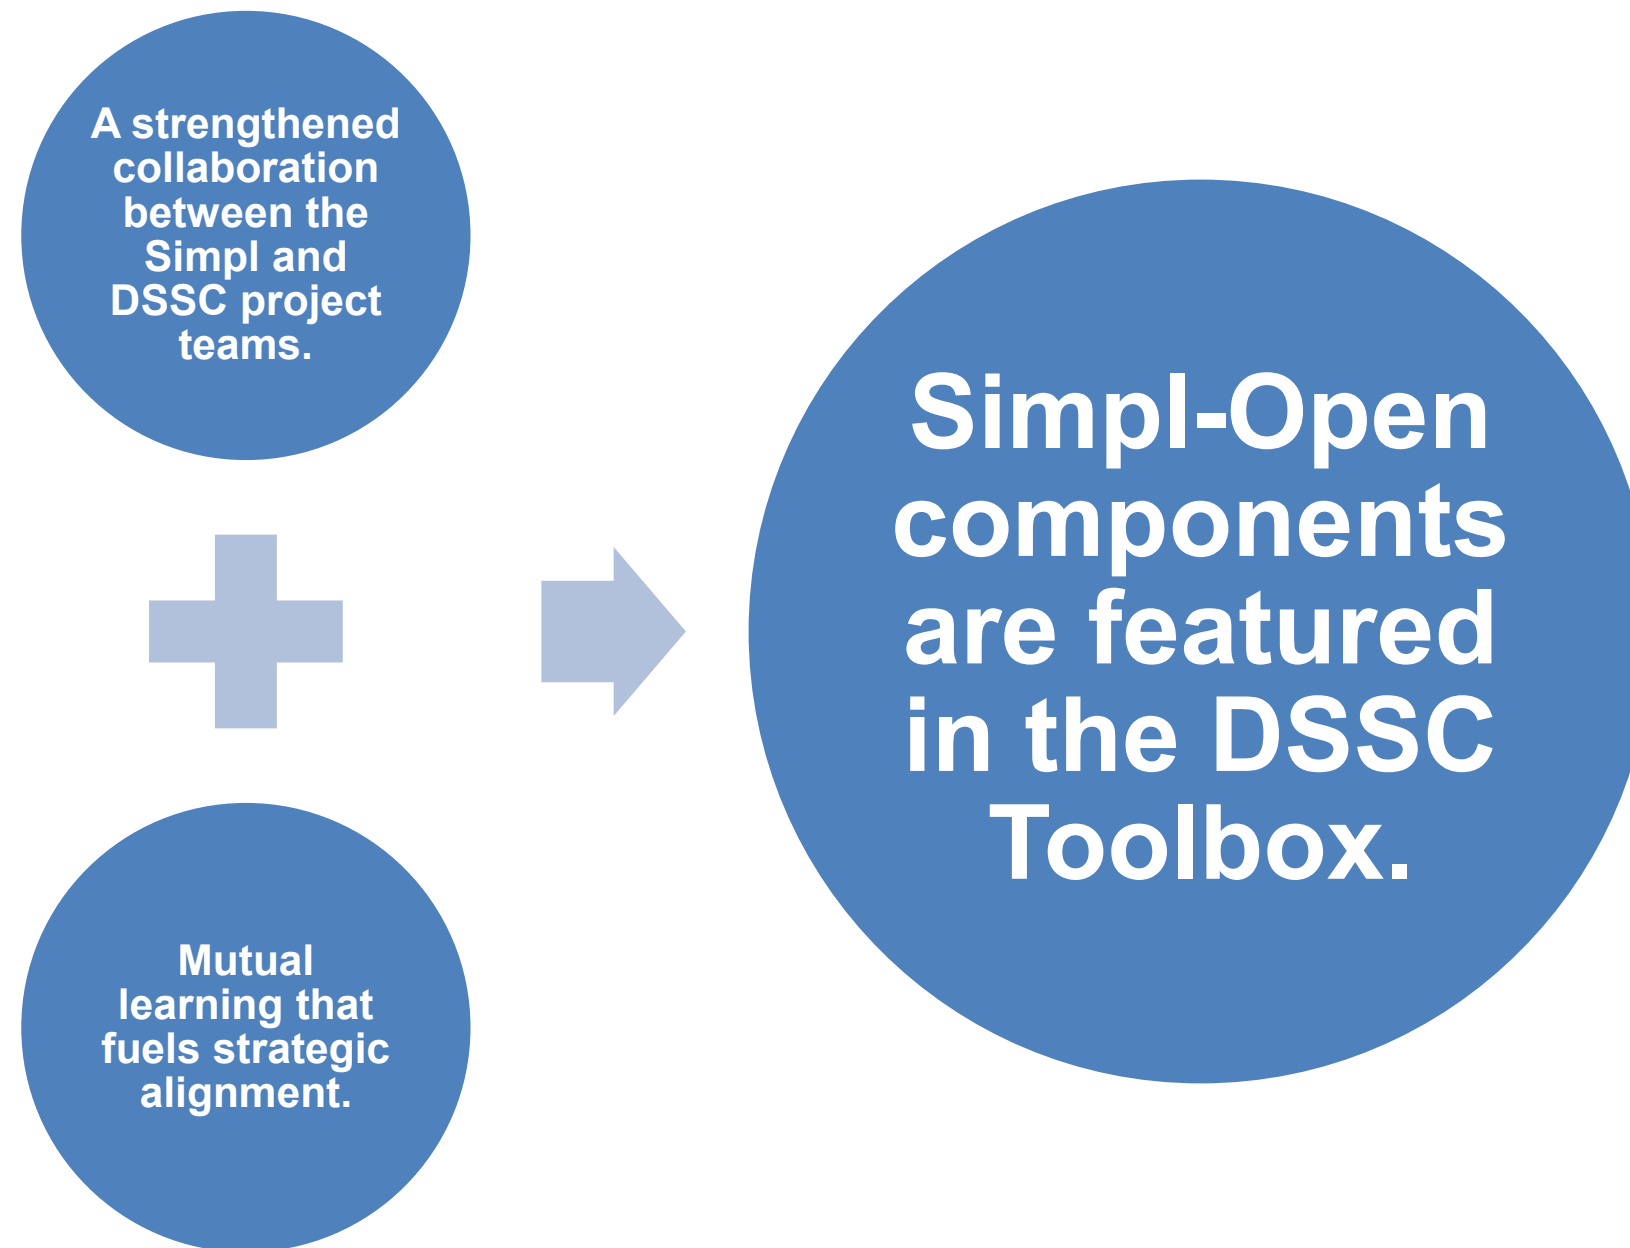

Fully integrated with
the Blueprint v3

Latest addition:
Simpl-Open
components

Simpl-Open components are in now!

DSSC Toolbox v3

4 components. 1 middleware solution

- Simpl-Open - Participant Agent
- Simpl-Open - Vocabulary Service
- Simpl-Open - Catalogue
- Simpl-Open - Trust Service

Integrated with Blueprint v3

DSSC Toolbox v3

The DSSC Blueprint consists of a set of business & organizational and technical building blocks.

These specify the required functionalities and capabilities for data spaces.

To set up and participate in a data space you need practical solutions that provide these functionalities. You need data space tools!

Technical Building Blocks > Data Interoperability > Data Models

capability.

As a separate explainer, we provide a [best practice](#) for setting-up ad models.

5. Implementation

This building block relates primarily to the following [service](#):

- **Vocabulary service:** The storage and publication of all data mo within a vocabulary service. Each Vocabulary Service should pro which data models can be retrieved. It should allow access to th levels of a data model and enable the exchange of metadata fo the DCAT standard. That latter enables the exchange of data m spaces.

Other services, such as the participant agent, can use the data mode the vocabulary service.

6. Glossary

The terms being used in this page and conceptual model are specifie

Term	Definition
Data Model	A structured represen elements and relation facilitate semantic inte and across domains, e vocabularies, ontolog

Our journey continues...

DSSC Toolbox v3

The Toolbox will be continued by the DSSC for the next 3 years.

What you can expect:

1. Improved curation

- Adding expert assessments
- Stricter checks for self-assessments
- Request content updates or remove entries

2. More tool registrations

- Especially in the business & organizational tools category; includes Legal tech

3. Machine readable export of the catalogue

- We've developed DS-TCAT, an extension of DCAT for (data space) tools

DSSC Toolbox v3

You can submit your solution via the DSSC support system.

Click on [Submit a tool](#) and follow the steps.

This requires filling in:

- A metadata template
- A self-assessment
