

# Data Spaces Symposium

Accelerating adoption. Increasing impact.

Data spaces take off in  
Medellín - Colombia:  
from trust to action

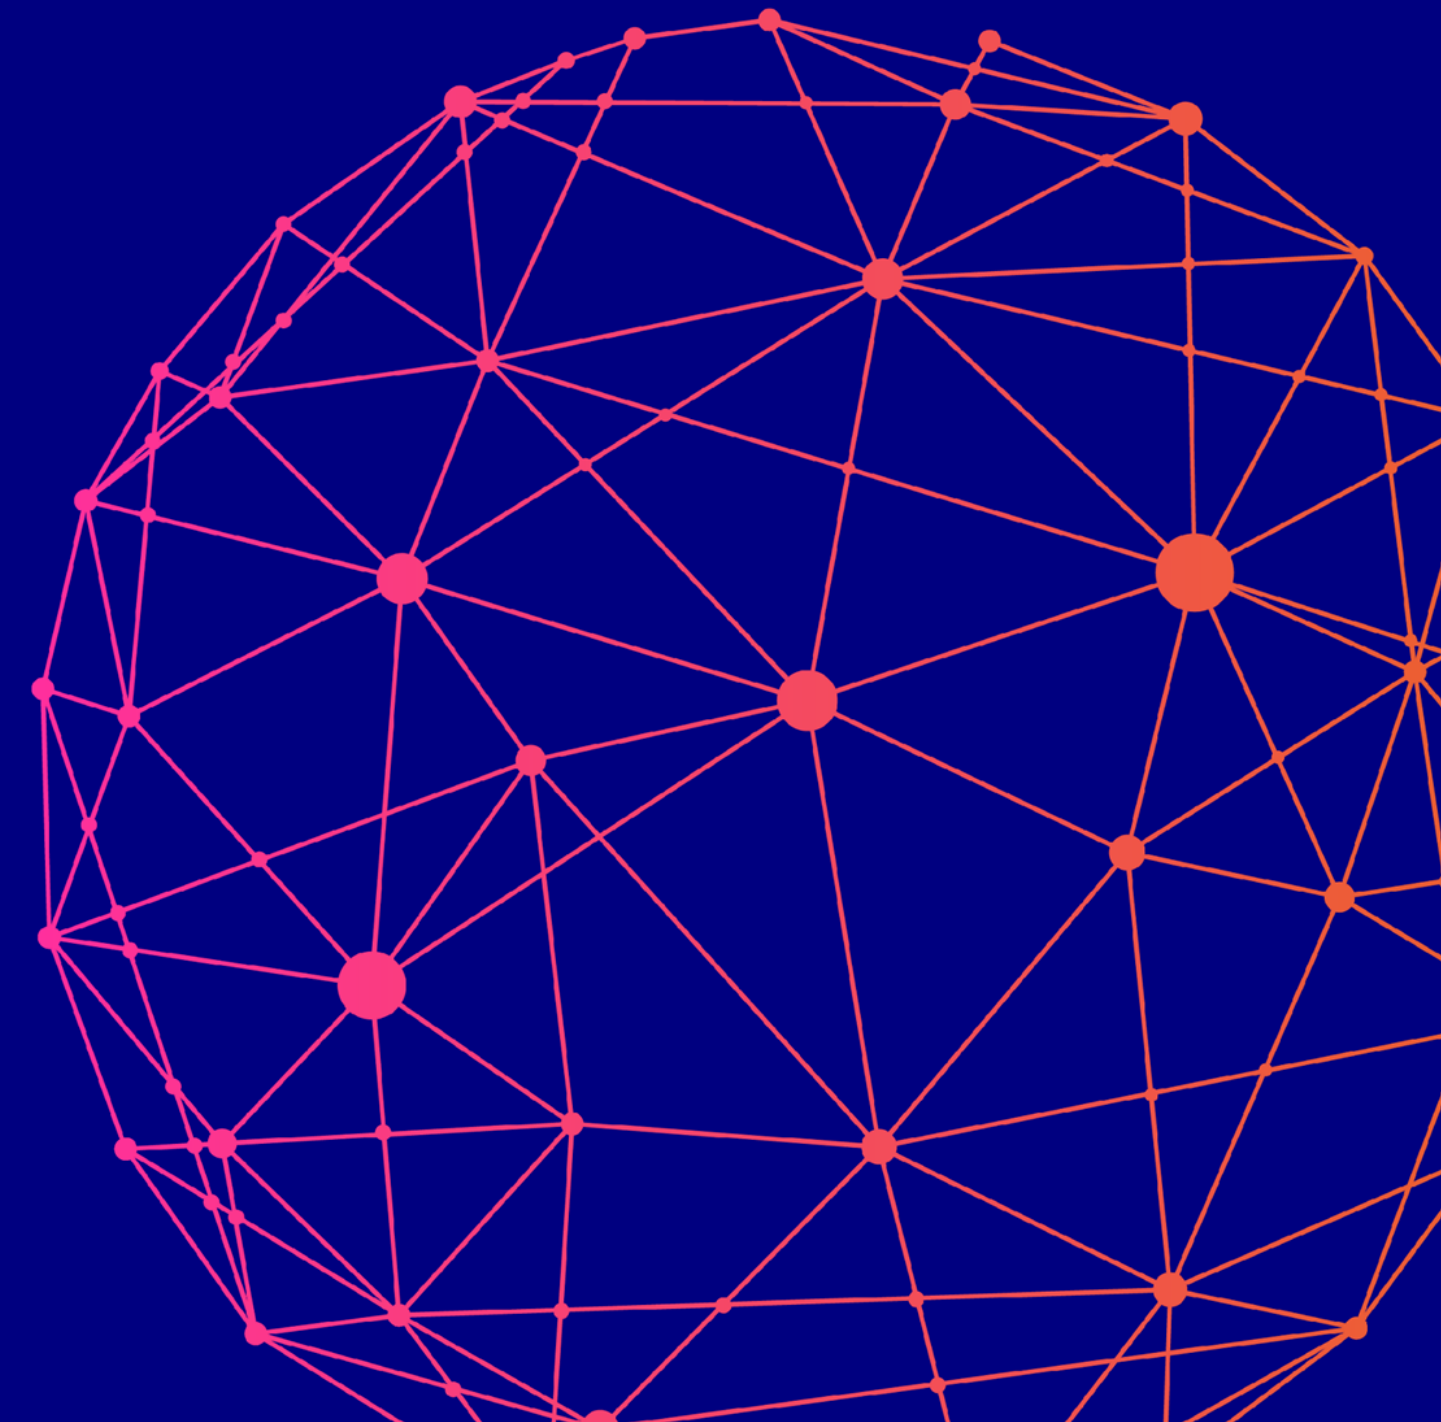

**Cluster  
Negocios Digitales**  
Medellín y Antioquia

Lidera

**CAMARA DE COMERCIO®  
DE MEDELLIN PARA ANTIOQUIA**

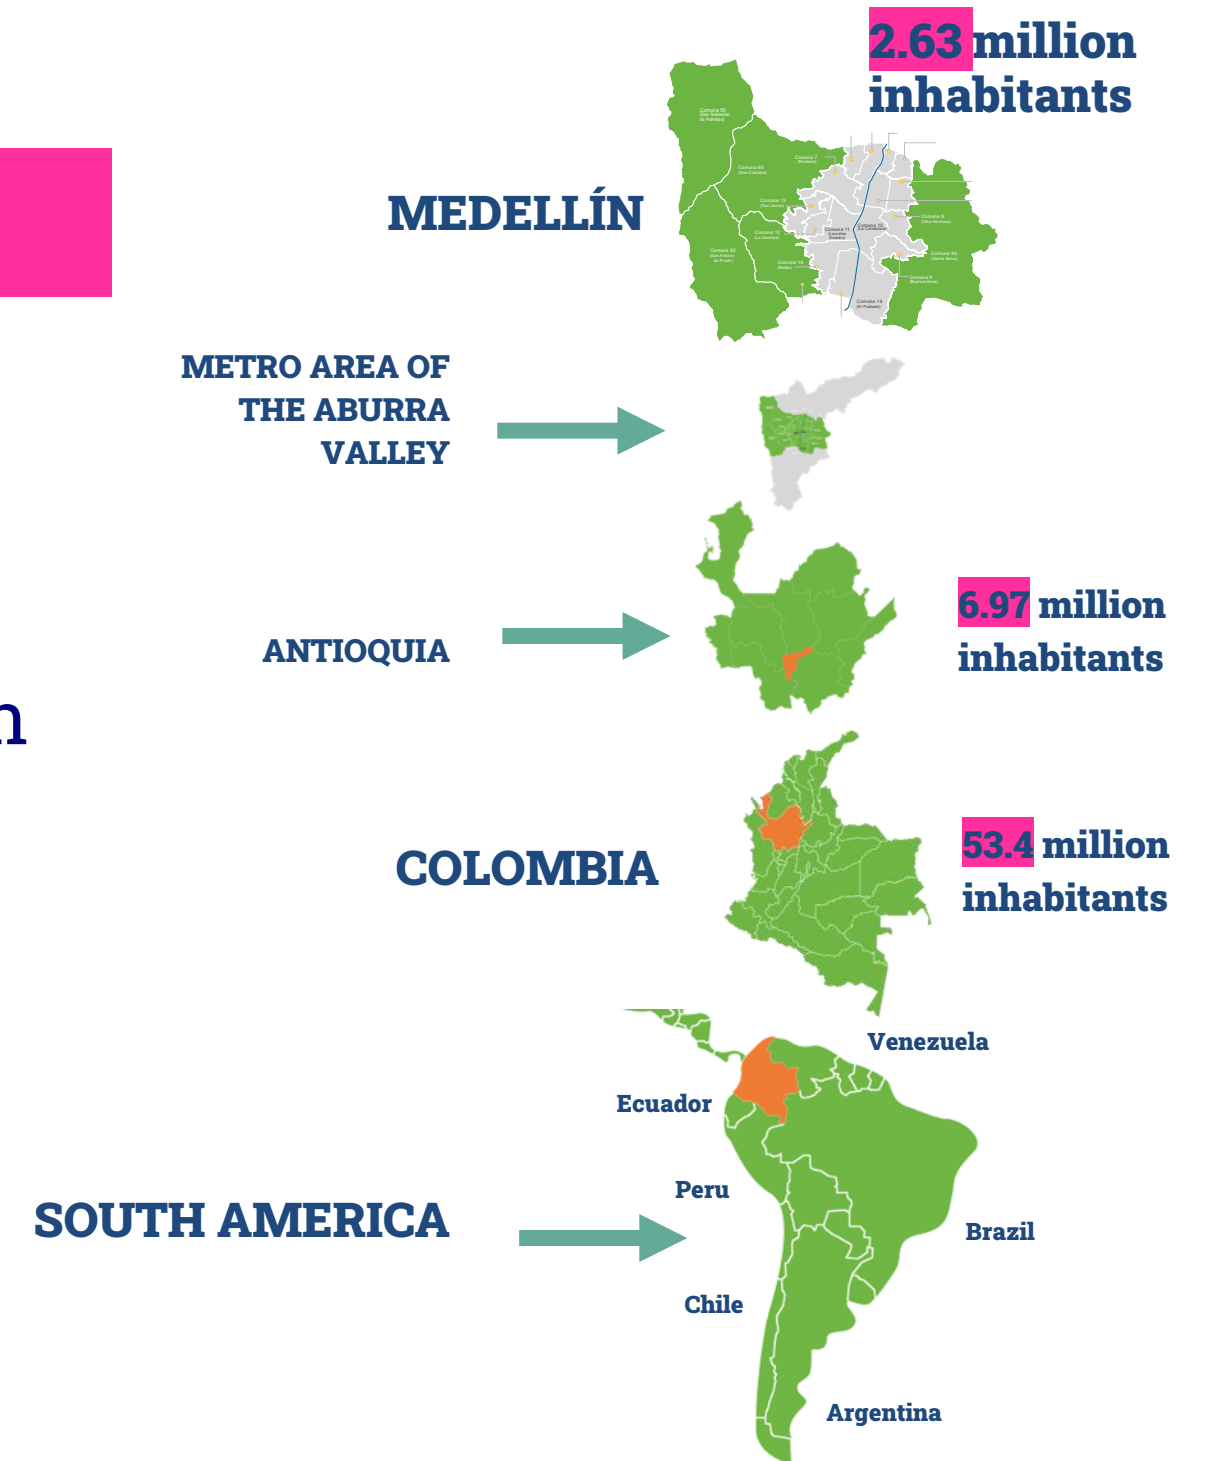

# Data Spaces Symposium

## Why Data Spaces matter for Medellín - Colombia

Data spaces as enablers of cross-border economic collaboration

- Fragmented data, **high potential**
- Need for trusted **collaborative** data
- Alignment with **internationally** proven approaches

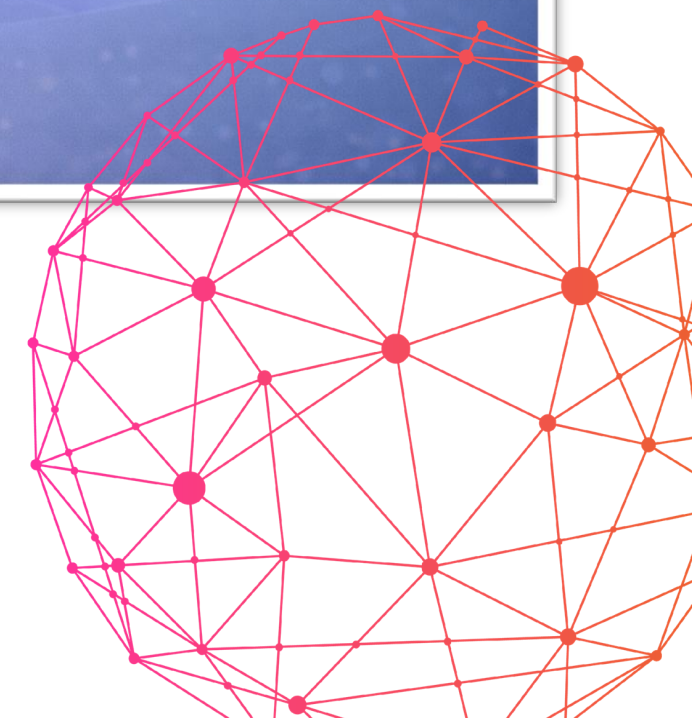

*Source: Projections issued by DANE. Data updated as of January 2026.*

# Data Spaces Symposium

From trust to action

We focused first on trust, governance and capabilities

- Shared governance principles
- Common understanding of data spaces
- Capacity building across sectors
- **Learning from European and global best practices**

# Data Spaces Symposium

Building an ecosystem, not isolated projects

A growing national ecosystem aligned with global principles

- **Companies, public sector, academia**
- Alignment with European data space approaches
- Long-term ecosystem vision

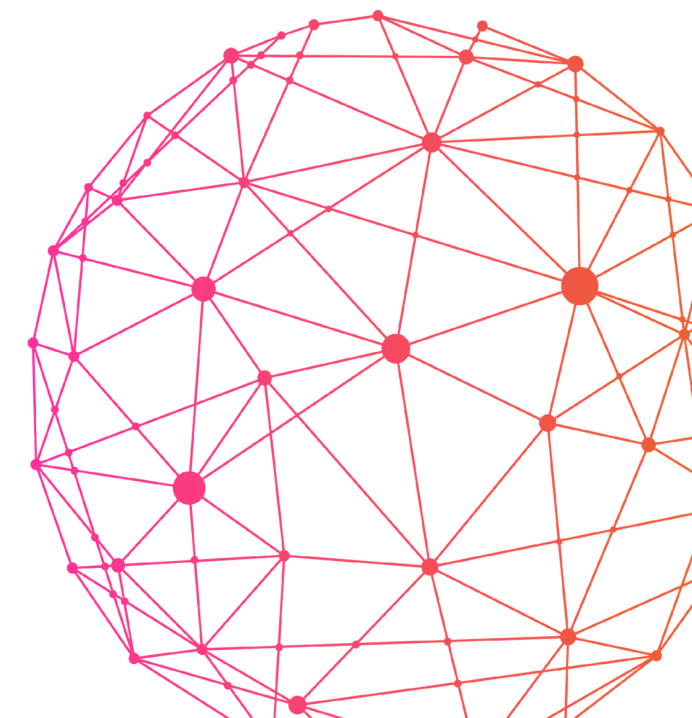

# Data Spaces Symposium

## Agro data spaces: from production to sustainable value chains

- Productivity and sustainability
- Agro 100 aims to become Colombia's first federated agri-food data space, turning territorial data into public services
- 24,000 producers already engaged, with scalable potential across 125 municipalities
- Federated data core and digital entry point, enabling traceability and data-driven rural services

### Public & ecosystem partners

# Data Spaces Symposium

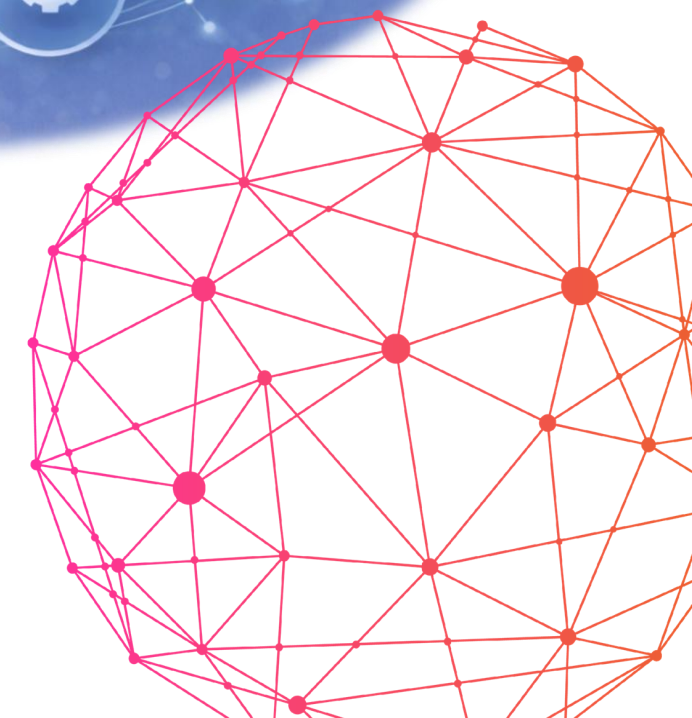

Health: aligning maturity with international frameworks

Health data spaces: improving care through trusted data sharing

- The health sector aims to deploy a federated health data space, aligned with international governance frameworks
- High digital maturity and clear priority use cases identified by public and private actors
- Strong focus on trust, governance and interoperability, enabling cross-border pilot cooperation
- **From data health to business-oriented strategies**

**Cluster  
Medellin Health City**  
Medellín y Antioquia

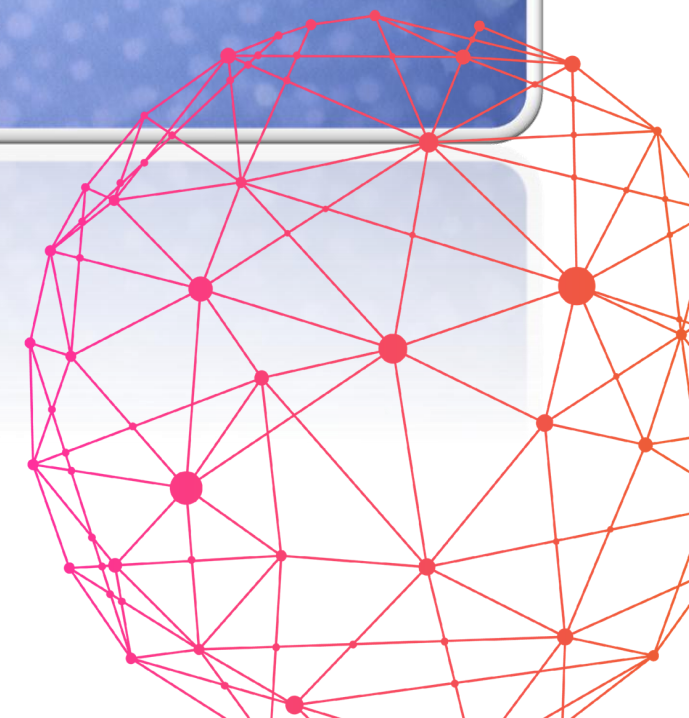

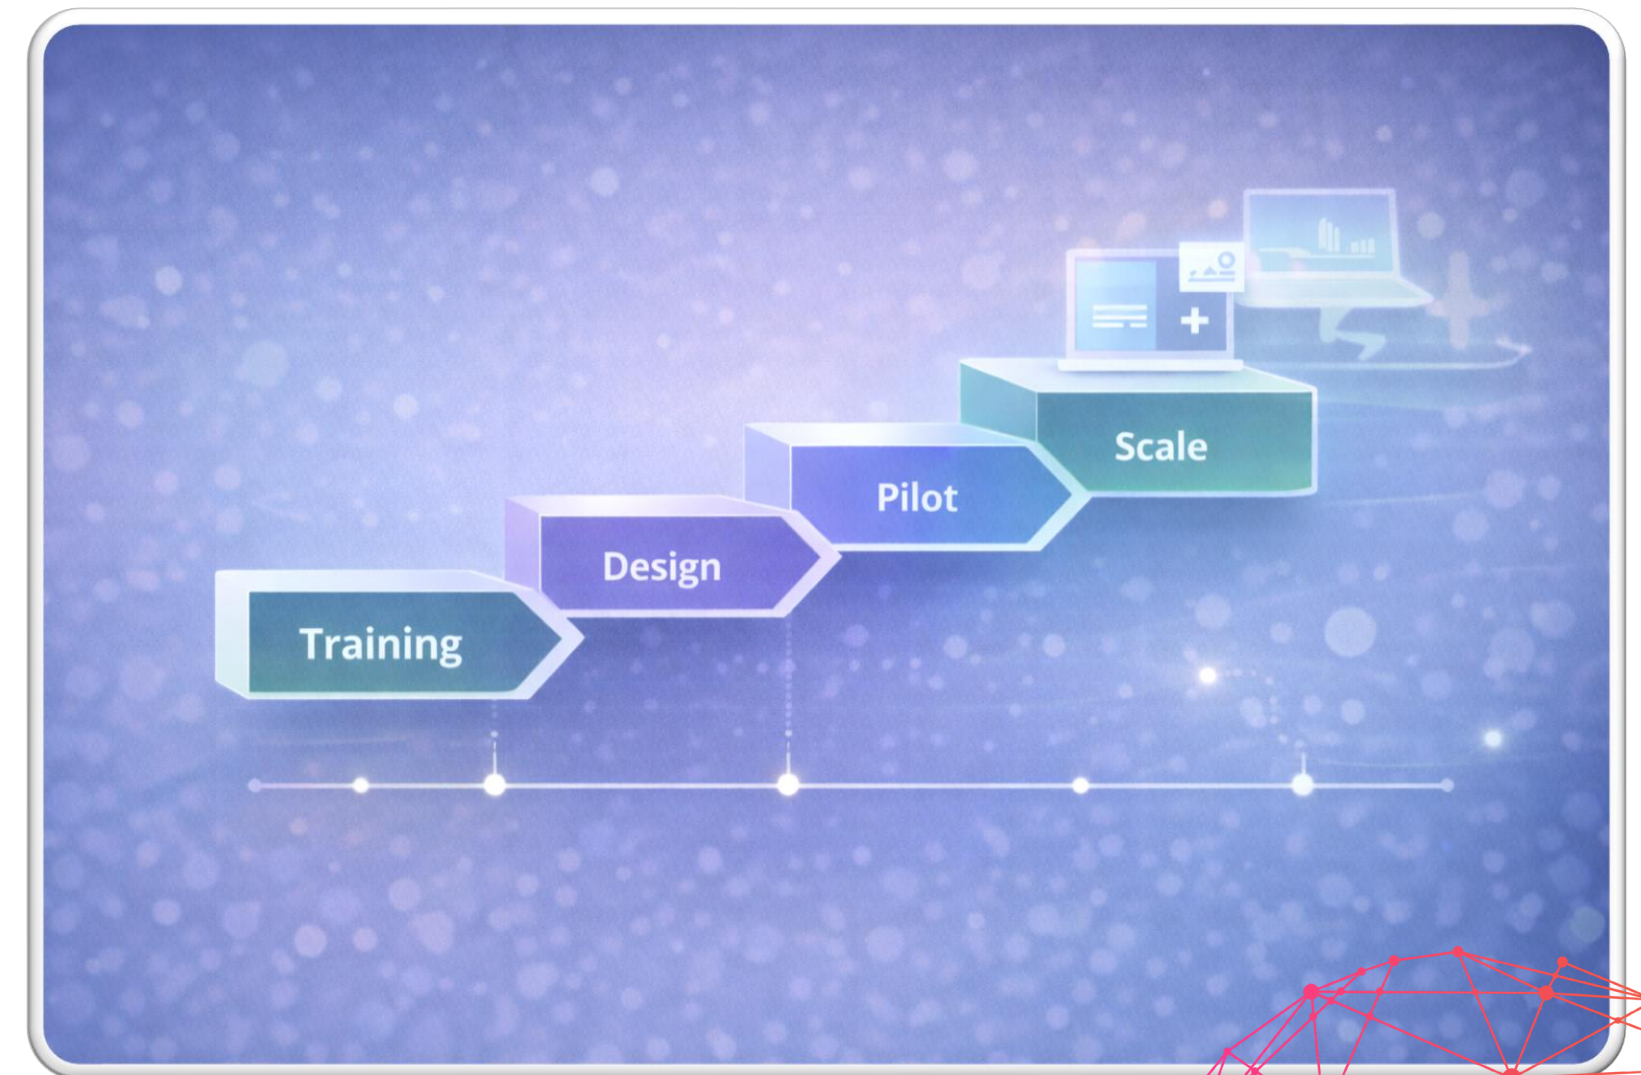

# Data Spaces Symposium

## From training to pilots

Training as a catalyst for globally aligned pilots

- Training as an enabler, not the final goal
- Use-case driven and governance-focused
- Concrete roadmaps towards pilot implementation

# Data Spaces Symposium

Global convergence into action

From global convergence to concrete action

- Medellín - Colombia is converging into the global data space ecosystem, aligned with international governance and interoperability frameworks
- Now is the moment to move from alignment to action, through cross-border cooperation
- We invite global partners to co-create pilots and scale trusted economic collaboration

# Data Spaces Symposium

Let's co-create pilots together

- Explore international cooperation agreements
- Co-develop Agro and Health pilots
- Connect Medellín - Colombia to the global data space ecosystem
