Data Spaces Symposium

The world's leading event on data spaces enters its fourth edition – and is coming to Madrid!

The Data Spaces Symposium brings together pioneering thinkers, innovators, and organizations shaping a connected, data-driven future. Under the motto “**Accelerating adoption. Increasing impact.**”, the 2026 edition will highlight how data spaces enable collaboration and competitiveness — how they unfold impact on a global scale.

Following the success of previous editions, the 2026 edition takes place on 10–11 February in Madrid. Spain has emerged as a frontrunner, investing heavily in data spaces as a driver of innovation and competitiveness.

Key themes in 2026 will include:

- » Data Spaces as strategic driver for innovation and competitiveness
- » Showcases of best practices & real-world impact: highlighting successful data space adoptions
- » Data Spaces as enablers of AI: providing the trustworthy data for future AI
- » Relevance of standards & interoperability: advancing global harmonization of data space technologies
- » Market-ready tools & solutions that enable data space implementation
- » The first European Data Spaces Awards ceremony

The DSSC will highlight its achievements in its first three years, presenting the foundations it has laid for building and operating data spaces. Expect transformative discussions, visionary insights, and tangible solutions for everyone planning, building, or scaling data spaces!

Novotel Madrid Center, Calle de O'Donnell, 28009 Madrid, Spain

Data Spaces Symposium

- » Data Spaces as a strategic driver for innovation & competitiveness

Trusted data sharing strengthens Europe's digital economy, enables cross-sector collaboration, supports the digital single market.

- » Real-world cases & measurable impact

Industry and public sectors demonstrate how data spaces are successfully creating value.

- » Data Spaces as enabler for trustworthy AI

Data spaces provide high-quality and sovereign data as a foundation for reliable AI systems.

- » Standards and interoperability

Essential prerequisites for scaling data spaces across companies, sectors and continents

- » Tools & solutions enabling data space implementation

Assets for creating and operating data spaces; the work of the DSSC in providing blueprints, guidelines, and assets for interoperability, trust, and scalability across European data spaces

Data space
– indispensable
enabler for
trustworthy
AI

Data space
standards –
interoperable
and globally
harmonized

Data space
tools & solutions
– ready for real-
world impact

Data spaces
– measurable
social, economic
& environmental
impact

Data spaces
strengthening
the economy,
enabling
collaboration

**Accelerating
adoption.
Increasing
impact.**

Data Spaces Symposium

Program day 1 | 10 February 2026

International Day

08:00	Registration			
09:00	Intro plenary session Building Europe's data advantage Welcome keynotes			
09:30	Keynote Shaping the Future of Data Spaces: The Data Spaces Support Centre Success Story			
09:45	Panel discussion The journey of data spaces: achievements, potentials, horizons			
	Renate Nikolay, European Commission Alberto Gago, Spanish Government Boris Otto, Fraunhofer ISST Boris Otto, Fraunhofer ISST Nuria Avalos, IndesIA Ruth del Campo, Spanish Government Oliver Ganser, BMW Bjoern Juretzki, European Commission Jeanette Nilsson, RI:SE			
10:30	Coffee & networking			
11:00	Users track From vision to value: data space success stories in manufacturing & supply chain	Providers track Business models & financial viability in data spaces	Innovators track Data spaces as key enablers for AI	
12:30	Lunch			
14:00	Users track How data spaces can drive compliance automation & help reduce admin burden	Providers track Solutions and tools you need to operate a data space	Innovators track Data Labs and AI Factories	Breakout session From Insights to Action: Co-Creating the Future of Data Space Education
15:30	Coffee & networking			
16:00	Plenary session Data spaces everywhere – enabling economic collaboration How the Berlin Declaration can push data spaces as indispensable element of digital ecosystems and AI Data Spaces take off in Colombia: from trust to action Data smart contracts and data identification systems, and subscription-based data distribution systems and billing Panel discussion Many countries, one concept: how data spaces take shape worldwide Keynote The power of Europe for trusted data sharing Closing and summarising the day			
	Ernst Stöckl-Pukall, German Government Andrés Arias, Chamber of Commerce Medellín-Antioquia Jun-Kyun Choi, Korea Advanced Institute of Science and Technology Lars Nagel, IDSA Ruth del Campo, Spanish Government Masaru Dobashi, NTT Data Keith Jansa, Digital Governance Canada Koteswararao Kondepu, IIT Dharwad Mateus Pierre, El Dorado Mário Campolargo, Universidade da Aveiro Tobias Guggenberger, Fraunhofer ISST			
19:30	Awards & evening gala European Data Spaces Awards and evening gala Data space best practices			
	Boris Otto, Fraunhofer ISST Ana Garcia, BDVA Awards candidates & winners			

Data Spaces Symposium

Program day 2 | 11 February 2026

Future Day

08:00	Registration				
09:00	Plenary session Data spaces at work – global industry perspectives Grand opening of Data Spaces Symposium day 2 Keynote The Spanish strategy on data spaces		Ulrich Ahle, Gaia-X María Gonzalez, Spanish Government Bettina Tratz-Ryan, Gartner Group Stefan Hoppe, OPC Foundation Sandra de Lucas, Airbus Michitaka Tsuda, IPA Thomas Rösch, Cofinity-X Nikolaos Saklampanakis, Fujitsu Marvin Pawelczyk, bitkom		Breakout session Building an agricultural data space that endures
09:30	Keynote Gartner’s hype cycle for manufacturing				
09:45	Panel discussion Data spaces at work – global industry perspectives				
10:30	Coffee & networking				
11:00	Users track Addressing real needs, creating added value: empowering municipalities and regions through data spaces	Providers track Legal enablers for data sharing: state of play and path forward	Innovators track Beyond public funding: unlocking investments in data spaces	Breakout session Who onboards the millions? Solving data spaces at scale	
12:30	Lunch				
14:00	Users track How data spaces help to unlock cultural, media and linguistic resources	Providers track Interoperability & standards – the key factor for scaling data spaces	Innovators track Europe’s Defence Data Space: An enabler for Military Innovation and Strategic Autonomy	Breakout sessions Deploying Interoperable Data Spaces with the FW Data Space Connector	
15:00	From insight to impact: incentives driving SME participation in data spaces		Scientific data: Key enabler for innovation	Embarking on the Compliance Journey: Data Spaces as a Backbone for Responsible AI	
16:00	Break				
16:10	Closing plenary session From insight to action: the road ahead for data spaces Symposium wrap-Up and Intro to the last session Pitch IPCEI-AI – Linking data spaces to AI key initiatives Pitch Model Provider: NX AI Pitch Solution Provider: Synera.io Keynote Venturing together – how the data space community can build (ad)ventures, not just standards Keynote DSSC wrap-up – success and impact of our project		Tobias Guggenberger Emma Wehrwein, eco Robert Weber, NX-AI Marc-Florian Uth, Synera Mehemed Bougsea, Think-it Boris Otto, Fraunhofer ISST
